Our Products Deliver New Interaction and Excitement

OEMs and ODMs come to us with a wide range of requirements. Some know exactly what they want. Others have a general goal (more interactivity, a competitive advantage) and look to us to create the right solution that takes them there. And some want to leverage our **OneTouch** solution and its family of configurable capacitive sensing chips—that they can integrate easily into their device.

We're flexible. We engage with our customers to the interface solutions they need to complete. Our customers benefit from our wide-ranging **technological expertise** in all aspects of human interfaces, our industry-leading product portfolio, and our end-to-end **solution stack**.

Explore our products via this matrix.

Product	Function & Design	Engagements	Advanced Gestures	Primary Market Applications
TouchPad	2D: opaque	custom module	ChiralMotion, Momentum, Pinch, Flick, Rotate	Notebook PC, Peripherals
NavPoint	2D: opaque	custom module	Scroll, Flick	Mobile, PDE, Peripherals
LightTouch	0D, 1D: opaque	OneTouch or custom module	Button Input, Scrolling Ballistics	Notebook PC, Peripherals, Mobile, PDE
ClearPad	2D: clear	custom module	ChiralMotion, Pinch, Flick, Rotate, Enabled for character entry	Mobile, PDE, GPS
ClearArray	0D, 1D: clear	OneTouch or custom module	Button Input, Scrolling Ballistics	Mobile, PDE, GPS, Notebook PC, Peripherals
Proximity	0D	OneTouch or custom module		Notebook PC, Peripherals
FlexPad	2D	custom module	Flick, Scroll, Enabled for character entry	Mobile
